The Luxurious Look of Real Slate Without the Worry and Expense.

IKO Crowne Slate designer laminate shingles owe their spectacular appearance to IKO's advanced Colour blending technology. It works beautifully to mimic the subtle transitions of sought-after natural slate tiles.

Available in IKO's special "Advantage" size, these shingles are also the largest we make in their class, with a generous 10-inch exposure. That's 40 shingles to a square. Some competitors' comparable shingles can have 50 or more shingles per square, so IKO Crowne Slate gives you a minimum of 10% more coverage for potentially faster installation and less waste.

A surface coating of IKO modified asphalt also provides superior weather-resistance. On the roof, their dimensional thickness helps create the look of natural stone. In your hands, their weight will convince you that we've built them to last. They're constructed of two fiberglass mats laminated together. The lower ("shim") is coated with oxidized asphalt; the upper ("lid" or "cap") is saturated with our special IKO modified asphalt.

Crowne Slate™

SPECIFICATIONS ³	Limited Warranty ¹	Limited Lifetime	Dimensions (L x W)	39 1/2 in (1003 mm) x 13 1/4 in (336 mm)	STANDARDS ⁴	ASTM D3462
	Iron Clad Protection ¹	15 Years	Exposure	10 in (254 mm)		ASTM D3018

IMPORTANT! To ensure complete satisfaction, please view several full-size shingles and an actual roof installation prior to final Colour selection as the shingle swatches and photography shown online, in our brochures and in our app may not accurately reflect shingle Colour and do not fully represent the entire Colour blend range, nor the impact of sunlight. The information in this literature is subject to change without notice. We assume no responsibility for errors that may appear in this literature.

Note: ¹See Limited Warranty at IKO.com for complete terms, conditions, restrictions and application requirements. Shingles must be applied in accordance with application instructions and local building code requirements. ²High-wind application is required. ³All values shown are approximate. ⁴Products are developed with reference to these standards.
